Expression of Interest

for the

**Supply of Lightning Location Sensors and Server Platform
to the South African Weather Service
for a one-year
inter-comparison project.**

Expression of Interest: Product Specification, Lightning Detection

1 DESCRIPTION

The South African Weather Service (SAWS) hereby would like to invite interested parties to indicate their interest in the provision of Lightning Location Sensors and Server Platform to SAWS for a period of One (1) year, from August 2025 until July 2026, as part of an inter-comparison project.

2 INTRODUCTION

The South African Weather Service (SAWS) is a public entity of the Department of Forestry, Fisheries and the Environment (DFFE) and derives its mandate from the South African Weather Service Act (No 8 of 2001 as amended). The public entity is listed as a Schedule 3A Public Entity in terms of the Public Finance Management Act (PFMA).

SAWS is tasked with providing timely and accurate scientific data in the field of meteorology to the broader South African society: a combination of both public good and commercial services. The organisation plays a vital role in South African public life, not just as a provider of key services, but also in empowering citizens to adapt the effects of the ever-changing weather.

3 BACKGROUND

The Technical Service Department is the electronic technology development, installation, maintenance and operational management arm of SAWS. The unit is responsible for the maintenance and improvement of integrated electronic atmospheric weather monitoring and observational systems to enable forecasters, researchers and climatologists to issue accurate predictions. The Department: Technical Service is at the forefront of technological development of observational and early warning networks for severe weather as well as routine meteorological observations.

SAWS currently is utilizing 26 Sensors and Processor Server in its Lightning Detection Observational Network.

4 REQUIREMENT / SCOPE OF WORK

- 4.1 The Lightning Sensor Network and Server currently in use have been in use over the past 15 years. SAWS is currently looking into the options available in the market for the supply and delivery of Lightning Location Sensors and Server with the possibility of incorporation of the current sensor network.
- 4.2 The objective of the Expression of Interest (EOI) is solely to allow suppliers of Lightning Location Sensors and Server Platforms to participate in the inter-comparison project hosted by the South African Weather Service.

Expression of Interest: Product Specification, Lightning Detection

- 4.3 As member of the World Meteorological Organization (WMO) equipment and sensors must comply with the requirements of the WMO standard, as per INFCOM (CIMO-8 Chapter 1). As well as compliance to the South African Weather Service Act (No 8 of 2001 as amended) section 4 (3), “severe weather-related warnings” especially with emphasis on the lightning detection technology. For an effective “Thunderstorm Warning System (TWS)”, compliance to South African National Standards (SANS) 62793 “Protection against lightning – Thunderstorm warning systems”, SANS 62305 “Protection against lightning” and the International Electrotechnical Commission, IEC 62858 “Lightning density based on lightning location system (LLS) – General principles) are critical. SAWS also provide meteorological information to the aviation industry and data gathered by lightning sensors located around the country must therefore also comply with the requirements of the International Civil Aviation Organization’s (ICAO’s) requirements, as per SACAA Regulations Part 139.
- 4.4 SAWS hereby invite suppliers to declare their interest in making their lightning location sensors and a respective server available to SAWS. Service providers may indicate their respective coverage area, should they have an existing network within South Africa. Alternatively, SAWS could be engaged to provide installation space at existing SAWS locations for a period of 12 months (August 2025 to July 2026) for the purpose of measuring and comparing data recorded collected from the lightning sensors in accordance with the requirements of the standards listed in 4.3 (above) for meteorological sensors and data collection. The suppliers are requested to provide their equipment at personal cost, whilst SAWS will provide the land space for inter-comparison. A representative network with its respective computer interface and a complete spares bin will be required.
- 4.5 It will be the responsibility of the service provider to maintain the lightning sensors and server and to provide SAWS monthly with a full report on all maintenance conducted on the lightning sensors and server.
- 4.6 During the 12 months period (August 2025 to July 2026) SAWS will monitor, verify and analyse the data of each lightning sensor and stored on the respective server, take into consideration system downtime, maintenance / repairs conducted, functionality and any other measures which are deemed important for the operation and maintenance of the lightning sensors and the respective server.
- 4.7 After the 12 months period (August 2025 to July 2026) service providers will be required to decommission and remove their equipment from the premises of the SAWS Weather Office or related infrastructure sites (July 2026 to September 2026).
- 4.8 SAWS will not be liable for any costs to be incurred by service providers for the supply, installation, maintenance or insurance of the lightning sensors and respective server to be installed at the SAWS Weather Office or related infrastructure sites and decommissioned after the 12 months period or the removal period.

Expression of Interest: Product Specification, Lightning Detection

- 4.9 Based on the outcome of the evaluations conducted over the 12-month period (August 2025 to July 2026), SAWS may, at its own discretion, decide to invite suppliers to quote for the supply of lightning sensors, respective server, and spare parts for a specific period.
