

Join Us in Building a Resilient Future!

The Government of Flanders in partnership with the South African Weather Service (SAWS) is proud to support the Lejweleputswa District Municipality in enhancing its resilience to extreme weather events that are induced by climate change and variability. As such we are excited to announce the implementation of an **Integrated, Climate-driven, Multi-hazard Early Warning System (ICMHEWS)** project in partnership with the District and other key stakeholders. As part of this project, there is a five-day workshop between **15-19 April 2024** organized in collaboration with the Provincial and District disaster management. The workshop aims to bring together representatives from government agencies, educational institutions, the private sector, NGOs, community organizations and civil society to share knowledge and learning on early warning to support disaster risk reduction and management.

Integrated Climate-driven Multi-Hazard Early Warning System (ICMHEWS) Project WORKSHOP

5-day WORKSHOP

15 – 19 April 2024

SPECIFIC OBJECTIVES:

- Near real time multi-risk knowledge co-generation and co-production.
- Public education and awareness of risks, improved dissemination of impact-based messages and warnings
- Facilitate a constant state of preparedness and enabled early action, and,
- Monitoring and evaluation

KEY FEATURES:

- Enhancing Risk Knowledge for Extreme Weather Readiness and Resilience
- Fostering Collaboration, Communication and Capacity Building for Extreme Weather Events
- Integrating Knowledge and Operations for Comprehensive Resilience to Extreme Weather

ACTIONS TO TAKE:

- Stay informed about climate risks in your area
- Follow safety instructions during extreme weather events
- Participate in community preparedness activities
- Use SAWS multi-media channels to access weather and early warning information
